

Please be reminded that students should only attend first aid if it is absolutely necessary.

If a student requires first aid, they must follow the school's first aid procedures by first informing a member of staff that they do not feel well. That member of staff will determine if the student should be sent to a first aider, or if they can be dealt with locally (i.e. – drink of water).

If your child has sustained an injury away from school (evenings, weekends or holidays) you must seek medical advice from your GP or the local hospital. If your child sustains an injury which may impair their mobility (use of crutches/walking aid) please contact Mrs Raye Phillips, prior to them returning to school.

We do not have a trained school nurse on site. Our first aiders are trained to deal with an immediate injury or illness and to seek further medical assistance, if required.

Please assist us to ensure your child's learning is not disrupted by attending first aid unnecessarily.
